

TOPAZ

Architectural downlights

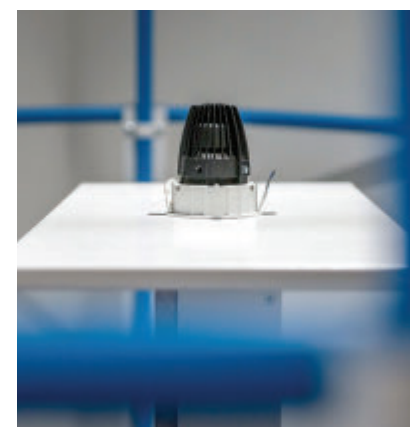

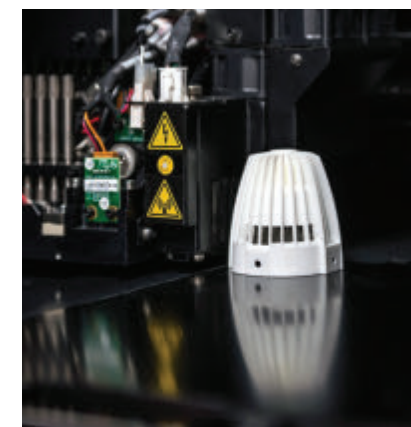

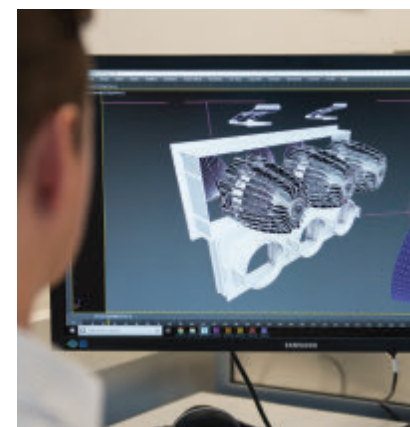

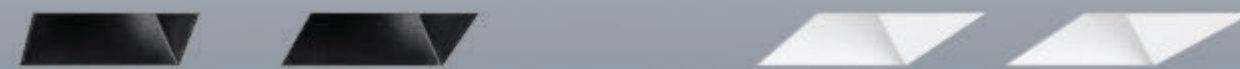

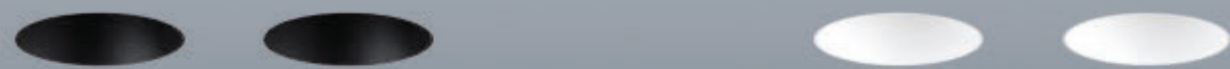

TOPAZ

Designed, developed, manufactured and tested in the UK, the TOPAZ range of architectural downlights offers a wealth of variety and performance excellence from a miniature luminaire. Backed up by our commitment to quality and our enthusiasm for flexibility, TOPAZ is the perfect choice for high-end indoor applications.

TOPAZ

An attractive low glare downlight with a sharp, defined cut-off and exceptional consistency across the whole beam width. LED engines are available with either the best of Xicato's technology inside or an excellent value for money Tridonic LED and driver system.

With a wealth of options, variants and accessories, TOPAZ is highly recommended as an ideal high performance, low energy alternative to conventional tungsten halogen downlights.

Available round or square, trimless or with a low profile bezel.

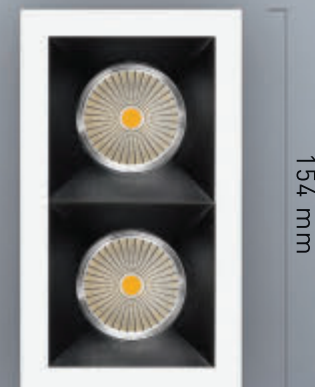

Choose from fixed downlight, fixed asymmetric or tilt adjustable engines.

Xicato

Designer Series™

Providing outstanding colour rendering and excellent consistency, the Designer module offers the perfect balance for professional illumination.

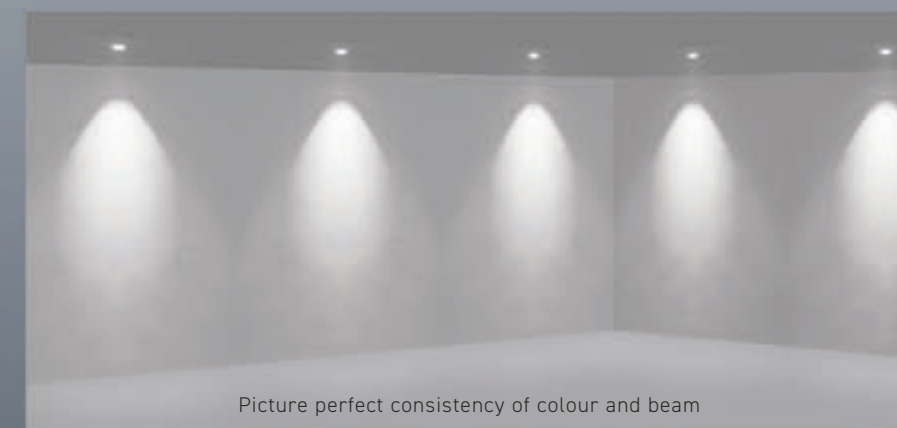

Artist Series®

Natural colours, virtually indistinguishable from halogen sources, with efficacy values far higher than fluorescent or CMH.

Vibrant Series®

A new form of light which enables us to see colours, hues and tones that are real but simply aren't visible under conventional halogen light.

Picture perfect consistency of colour and beam

Wireless systems

CASAMBI

A lighting control solution for the modern world using Bluetooth low energy to connect luminaires wirelessly then control, dim and group them via an app with smartphones, tablets or smart switches.

Xicato X GalaXi™

A Bluetooth mesh ecosystem that allows wireless connection and control with the added benefits of data collection, performance monitoring and even guest interaction with beacon capability
